

## **Soyoung Ha, Ph.D**

Prediction, Assimilation, and Risk Communication (PARC) Group  
Mesoscale & Microscale Meteorology (MMM) Laboratory  
National Center for Atmospheric Research  
Boulder, CO 80301, USA  
(Office) 303-497-2601 (Fax) 303-497-8181 (Email) syha@ucar.edu

## **EDUCATION**

- 2003 Ph.D. Atmospheric Sciences, Seoul National University, Seoul, South Korea
- 1996 M.S. Atmospheric Sciences, Seoul National University, Seoul, S. Korea
- 1993 B.S. Atmospheric Science Education, Ewha Women's University, Seoul, S. Korea

## **PROFESSIONAL RECORD**

2024-Present: Project Scientist III, NCAR, MMM Laboratory  
2020 – 2024: Project Scientist II, NCAR, MMM Laboratory  
2011 – 2020: Project Scientist I, NCAR, MMM Laboratory  
2006 – 2010: Associate Scientist, NCAR, MMM Laboratory  
2003 – 2005: Postdoctoral fellow in COSMIC/UCAR and MMM/NCAR  
2000 – 2003: Advanced Study Program graduate fellowship  
1999: Graduate visitor to the Constellation Observing System for Meteorology Ionosphere and Climate (COSMIC) program, University Corporation for Atmospheric Research (UCAR)

## **SCIENTIFIC RESEARCH HIGHLIGHTS**

- Main developer of the MPAS-DART interface based on unstructured meshes for Ensemble Kalman Filter (EnKF) data assimilation, serving as a point of contact for the MPAS-DART community
- Main developer of the Incremental Analysis Update (IAU) and the novel 2-stream I/O in MPAS-JEDI
- Leading atmosphere-biochemistry-land coupled data assimilation and forecasting efforts across labs at NSF NCAR
- Leading satellite data assimilation for air quality forecasting
- Model error representation in mesoscale ensemble analysis and forecasting system using stochastic or multi-physics ensemble
- Meso- and convective-scale weather prediction using various numerical models such as MM5, WRF, WRF-Chem, global and regional MPAS models
- In-depth understanding and contributions to advanced data assimilation algorithms including 4-dimensional Variational data assimilation (4D-Var), 3-dimensional Variational data assimilation (3D-Var), Ensemble Kalman Filter (EnKF), and various hybrid techniques, with high proficiency in state-of-the-art data assimilation systems such as WRFDA, GSI, DART and JEDI.

## **COMMUNITY SERVICE AND AWARDS**

- 2024-present: Associate Editor for Monthly Weather Review (ISSN: 0027-0644)
- 2010-present: Point of Contact for the MPAS-DART community support

- 2018: MMM Outstanding Achievement award on “The development of next generation data assimilation system based on the Objective-Oriented Prediction System (OOPS)”.
- 2013-2018: Korea Institute of Atmospheric Prediction Systems (KIAPS) Scientific Advisory Panel
- 2016: The Organizing Committee for the 2018 PyeongChang Olympic & Paralympic Winter Games (hosted by National Institute of Meteorological Sciences (NIMS)/Korea Meteorological Administration (KMA))
